*Explanation of Other Funds:**50/50 Local Matching Grants***Detailed Project Description and Justification:**

This project will reconstruct a deteriorating collector street. Improvements are expected to include new pavement, curbs, pedestrian facilities on both sides, street lighting, storm drains, traffic calming, and landscaping. Design and easement acquisition have been funded with \$600,000 in local road bonds. This grant, combined with a 50/50 local road bond match, will fully fund the project for a 2009 construction start.

Design and public involvement are underway. This project is the number 5 out of 23 road and drainage priority for the Northeast Community Council.

Curbs and pavement are deteriorating. Some portions of the road are not constructed to urban collector standards regarding pavement width, curbs, pedestrian facilities, drainage, and street lighting. This road serves Creekside Elementary School and Creekside Park.

The poor condition of the roads and sidewalks raise safety concerns due to the use by elementary school children.
